#1 Task – add Task ← how update? (→ History's state?)

new task in history → tasks not visible

Task – model

History – tasks

find where model updated by change

figure out what's missing from Add task

History View
— property change

tbTasks. setModel( )
              ↑
           update?

line 1601

tbTasks – getModel

pnTasks

filter tasks

Task Dialog – fire Prop Change

Day – add Task   646

Diagram:

Model — Task | Day

View/Controller
- Task Dialog → L fire Prop Change? — who handles?
- History View
- Day View
- tbToolbar / pnToolbar
- filter Tasks
- properties

JTable *   JPanel *   *JDialog   *Component

Everything in blue was was most relevant — what I didn't have initially bere the framework (i.e. Swing Components)
